

Two Great Implant Courses - Back-to-Back

Presented by the Mid-Atlantic Center for Advanced Dental Study

Sponsored by Astra Tech, Bay View Dental Lab, and Whip-Mix

March 9-10, 2012

Treatment Planning Implant Dentistry

Implants are an integral part of today's contemporary dental practice. CT Scans, bone grafting, guided surgery, immediate load, platform switching, and soft tissue management are but a few of the many considerations in implant dentistry. Even single tooth implant dentistry can present an array of functional and esthetic problems. The basics still start with accurate records and establishing proper tooth position. These and many other considerations will be discussed in this 1 & 1/2 day workshop on treatment planning implant dentistry. Students are required to bring their own cases for planning and diagnostic work-up prior to placement of the implants. As part

of the process we will discuss surgical templates, diagnostic wax-ups, custom trays, etc., making this a truly valuable educational program.

Topics for Review & Discussion

- When to order CT scans and how to utilize them
- Which implant systems to consider and why
- Surgical templates
- Indications for implants
- Customized emergence profile transfer
- Bone and tissue grafting
- Immediate load vs. delayed load
- Cement vs. screw retained
- Case design and material selection
- Implant Esthetics
- Plus much more

Course Hours

Friday, March 9, 2012 – 8:00am – 5:00pm

Saturday, March 10, 2012 – 8:00am – 12:00pm

Tuition \$695.00 • 12CE Credits

March 8, 2012

Using Patient-specific Abutments to Achieve Exceptional Results

Photos courtesy of Dr. Julian Osorio

This program will focus on patient-specific abutments and the simplicity and reliability they bring to the restorative process while allowing for functional and esthetic results for each individual patient. Using the most advanced computer technology, patient-specific abutments are available for all major implant systems and are designed and manufactured to the clinician's specifications. The benefits of providing an anatomically correct abutment earlier in the healing cycle will be discussed. A review of the coordination and communication between the lab, surgeon and restorative colleague to achieve exceptional results will also be provided.

Topics for Review & Discussion

- Discuss techniques and design of immediate and transitional temporaries
- Understand customization of implant-level impressions
- Integrate patient-specific abutments into any implant protocol
- Learn the easiest and most innovative way to restore implants via a CAD/CAM custom abutment system

Astra Tech is committed to new and innovative knowledge, however, some presentations may include controversial material. Sponsorship by Astra Tech does not necessarily imply endorsement of a particular philosophy, procedure or product.

Course Hours

Thursday, March 8, 2012

6:30 – 7:00pm Registration and dinner

7:00 – 9:00pm Lecture presentation

Tuition Complimentary • 2CE Credits

No refunds will be issued as this is a tuition-free course.

Your Lecturer

Robert F. Faulkner, DDS

Dr. Robert Faulkner graduated from The Ohio State University in 1980. Following a one-year hospital residency, he practiced general dentistry in northwest Ohio until 1990, when he returned to an advanced graduate residency program in prosthodontics at the UCLA School of Dentistry. Dr. Faulkner received his certificate in prosthodontics in 1992 as well as a certificate in maxillofacial prosthetics in 1993. In addition, he received full training through the UCLA Implant Center during his three year residency training programs. He has lectured extensively on several aspects of prosthodontics and implant dentistry, both nationally and internationally. Dr. Faulkner is the director of The Ohio Center for Osseointegration, a state-of-the-art continuing education facility for clinicians, technicians, and auxiliaries. Dr. Faulkner resides in Cincinnati, Ohio where he maintains a private practice limited to fixed and removable prosthodontics, maxillofacial prosthetics, and implant prosthodontics.

The participation of this speaker for Thursday night's lecture has been made possible through support from Astra Tech Inc.

Registration/Information for These Courses

Atlantis CAD/CAM
Gold Hue Abutment
[A \$450 Value]

Course Registration

Name _____ DDS/DMD/CDT CDT# _____

Address _____ AGD# _____

City _____ State _____ Zip _____

Phone (office) _____ (fax) _____ (cell-optional) _____

E-mail _____

What is the best time to reach you to confirm your registration? _____

How did you hear about this course? _____

Course Selection

- Using Patient-specific Abutments to Achieve Exceptional Results - Tuition Complimentary
- Treatment Planning Implant Dentistry - Tuition \$695.00

Form of Payment

Full tuition \$100 per person deposit to reserve seat (transferable/non-refundable)
balance due 30 days prior to course date

Bill Me *full tuition due 30 days prior to course date*

Check or Money Order enclosed Visa MasterCard

Card # _____ Exp. Date _____ V-Code _____

Cardholder Name _____ Signature _____

Billing Address (if different from above) _____

City _____ State _____ Zip _____

*Please mail this form to 1207 Volvo Parkway, Chesapeake, Virginia 23320
Or fax to 757-583-8878*

Thank you for registering! We will be contacting you soon with confirmation.

Cancellation Policy

Full refund less \$100 processing fee if cancelled 30 days before the course. Cancellation received within 30 days of scheduled class is accommodated with a one-time transfer to a future class - no refunds.
